SINK UNIT CARE AND MAINTENANCE INSTRUCTIONS

Congratulations on your choice of our sink!

Your sink is made of the finest quality stainless steel (Gr18/10), DIN 14301 or AISI 304 (suitable for food contact).

Keep your sink looking as good as new by following the care and maintenance instructions.

Instructions

For everyday cleaning of the sink, use household detergents suitable for stainless steel. After each use, rinse the sink with warm water then wipe with a soft, dry cloth.

- Do not use wire wool.
- Do not use chemical "silver cleaners", bleaches or detergents containing chlorine or any of its derivatives.

Warning!

- If the sink comes into contact with acidic materials, rinse immediately with plenty of water and wipe with a soft, dry cloth.
- Do not leave rusty objects in contact with the sink. Rust can cause staining, cracking or even permanent damage to the sink surface.
- To avoid staining of the surface, do not leave food or other materials with corrosive properties such as juices, salt, vinegar, mustard etc. on the sink for a long time.
- Do not place very hot objects directly on the sink. Place them on a special surface (board) made from wood or plastic etc.
- Avoid scraping the sink basin or draining board with utensils.
- Avoid dropping heavy or sharp objects onto the sink surface.
